

ADMINISTRATION IN POLICY ABSENCE

Occasions will arise when it shall be necessary for the Superintendent of Schools to resolve problems which are not covered by existing policy. The Superintendent will make the decision which he or she feels will best protect and advance the quality of education in the School District.

Such decisions should not be considered to take the place of officially written School Board policy. The Superintendent will recommend new policies to the School Board at its very next meeting, and he or she may, in some instances, feel that a special meeting is necessary.
